ABOUT

CAN REON will offer visitors performances – concerts, dance, theatre, art exhibitions – sculpture, video art, painting, installations in the middle of nature. The farm will start producing its own wine, reviving the abandoned vineyards, introducing modern methods and design thinking to traditional winemaking. Wine tasting, with wines from the area combined with new and locally sourced food will bring Catalan culture together with Dutch design to create a new cultural experience.

WHO

Renny and Leon Ramakers are Dutch and both internationally renowned in the design and music industry. Their background inspires them to create a place that brings together their own passion for arts, design, wine, food and music into a new contemporary wine farm experience.

WHERE

Masia CAN REON is located in Tiana, in the Maresme region, at the bottom of the Conreria hills, within the Serralada de Marina protected area. With an exceptional climate and natural environment, Tiana is just 15 minutes from Barcelona and the first town in the northeast of the Metropolitan Area. Tiana is located within a wine-growing area, the D.O Alella, where wine production dates back to Roman times. CAN REON is rooted on sablón soil, a typical porous sandstone that results from the decomposition of granites, and which, due to its characteristics, has a direct influence on the good quality of the wines.

ART:

The video installation: **"Encounter"**, (the Eagle Owl) by visual artist: Marjan Laaper from the Netherlands will be shown at Caen Reon in Tiana near Barcelona in September. There, the work will be on display at CAN REON's beautiful estate. An inspiring project by Renny Ramakers and Leon Ramakers. CAN REON offers visitors performances – concerts, dance, theatre, art exhibitions – sculpture, video art, painting, installations in the middle of nature.
